PROFESSIONAL SUMMARY

Software Developer with a highly technical hybrid profile, bridging the gap between robust Backend engineering and advanced AI/Big Data solutions. Experienced in designing scalable REST APIs, RAG architectures, LLM-based systems, and handling complex database management. Proven ability to optimize data pipelines, implement clean code, and solve challenges in critical environments utilizing agile methodologies, technical rigor, and quick learning.

TECHNICAL SKILLS

- **Languages:** Python, Java, Kotlin, SQL, C#
- **Backend & Frameworks:** Spring Boot, FastAPI, REST API, Microservices, OOP
- **Databases & Storage:** PostgreSQL, MongoDB, Supabase, Data Modeling & Optimization (SQL/NoSQL)
- **AI & Big Data:** LLMs / RAG, Computer Vision, LangChain, Apache Spark, Hadoop, Power BI
- **Tools & Systems:** Git / GitHub, Docker, Linux / Bash, Ubuntu Server, Virtualization, TCP/IP

PROFESSIONAL EXPERIENCE

Mobile & Backend Software Developer (Internship)

March 2025 – June 2025

IES Rafael Alberti

Cádiz, Spain

- Developed and maintained user interfaces and cross-platform application logic using Kotlin Multiplatform for Android and iOS systems.
- Implemented and designed replicable frontend components seamlessly integrated with backend services.
- **Data Quality & Verification:** Responsible for data validation and consistency across the interface, ensuring that critical information retrieved from APIs was highly accurate and error-free for the end-user.
- Collaborated within multidisciplinary teams under agile methodologies (Scrum), using Git / GitHub for version control.
